## TABLETOP CURRENCY SORTER—UW-500/UW-600

Glory's UW-500 (four stackers) and UW-600 (eight stackers) Currency Sorters were developed to improve function and reduce processing time after an in-depth analysis of banknote handling processes. They are equipped with a variety of features, such as a multi-stacker system that improves sorting and separating performance, a reject stacker system with two stackers, as well as a large-capacity hopper with a banknote function. These powerful sorters deliver outstanding performance at very reasonable prices. They are Glory's latest answer to the need for smoother, more efficient continuous processing of large amounts of banknotes. The UW-500/600 will streamline your work process and slash operational costs.
