

Xchange MANAGER EXPLORER

The latest evolution is here:

Software:

With Xchange Manager lite, just a few mouse clicks allow you to access our heads up display and quickly assess the status of all kiosks on your casino floor. A few more clicks allow you to create detail or summary reports for printing or exporting to a spreadsheet. The full version can be used to load theme selections and Xpacks like points-to-cash or points-to-voucher on your cXc and pXc kiosks.

Xchange Explorer has the latest improvements in monitoring capabilities. An exciting update is the ability for a single operator to monitor kiosks located across different properties from one central computer. Navigation and reporting are even more user friendly.
