

CASINO **X**change

ATM:

The latest edition to our selections for casinoXchange functionality is ATM. Kiosks can be built to your specifications with this functionality, or an upgrade package can be purchased to convert existing ticketXchange or casinoXchange units.

Western Money Systems is working with major cash providers to complete interfaces for popular ATM networks already in use throughout casinos.

Now, with our kiosk, you can bring ATM functionality from the back hallways directly onto your casino floor without disrupting your décor. Our kiosks can be customized in many ways including laminate to match your slot machines.

A closer look at a part unique to ATM functionality included in the upgrade kit:
