CASINO Xchange

High Capacity

The Fujitsu F610 dispenser holds up to 18,000 notes in 6 cassettes, providing more capacity than anything in the market place. Operators can define the denomination mix between cassettes during kiosk set up.

The cXc-HC cabinet is only 8" deeper than our standard model. Shown here with a new rounded top, also available as LCD ready. The LCD ready top box holds two 19" LCD monitors for the front and back, as well as two 24" LCD monitors on the sides.

Custom features like décor friendly laminate, glass with your artwork, static images with your logo for the touch screens, and even wrap designs are available for this model.
