POINT XchangeTM

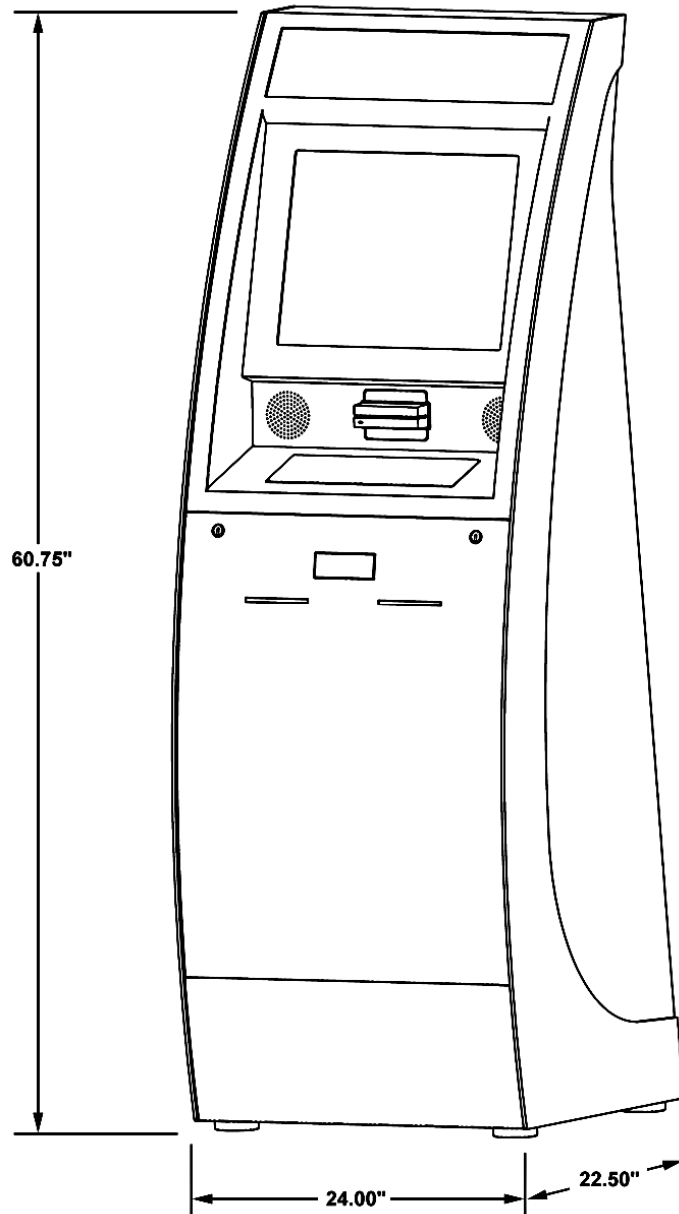

Compact Utility:

A space conscious and stylish kiosk, pointXchange provides a player interface to your rewards system.

Using a pXc with the appropriate Xpack, you can give your players the ability to check point values, convert points-to-voucher, or even select merchandise from an on-line catalog and print their own voucher.

Xchange Manager provides you with the interface to quickly manage the content displayed on your pointXchange kiosk. You can make updates or changes to your promotional offerings as often as necessary.
